Developer Documentation

[StockKit](#) — for stock-market apps

@lacspace/paper-trade

Paper-trading engine

[v1.1.1](#) · [zero dependencies](#) · [generated 2026-08-25](#)

Overview

The simulator core behind StockYatra. A virtual wallet, market/limit/stop orders that fill against live prices, positions, holdings and live mark-to-market P&L. Now with a per-fill charges hook (pair it with `@lacspace/market` for net P&L) and backtest-style stats — win rate, profit factor, avg win/loss. Drop it into any app.

Package: `@lacspace/paper-trade` · v1.1.1

Kit: StockKit — for stock-market apps

Runtime: zero dependencies

Install

```
npm i @lacspace/paper-trade
```

Quick example

```
acct.buy("RELIANCE", { qty: 10 })
```

Returns: **Order { status: "FILLED" }**

Tips & warnings

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
